## PLOSS-RA

Entreprises du Numérique Libre en Rhône-Alpes Auvergne

**PLOSS-RA.FR**

*Support since the creation (14 years)*

Conseil National du Logiciel Libre

*Also since the creation*

*Use of a lot of opensource software, protocols...  
Some contributions but our company is a pure "service player »*

*The year 2022 marks a strong commitment with mainly 2 international Opensource projects.....*

# Alinto and OpenSource solutions

## Webmail

Open-source webmail for free and collaborative use

## Mailcleaner

Email security appliance that can be deployed at the heart of your network

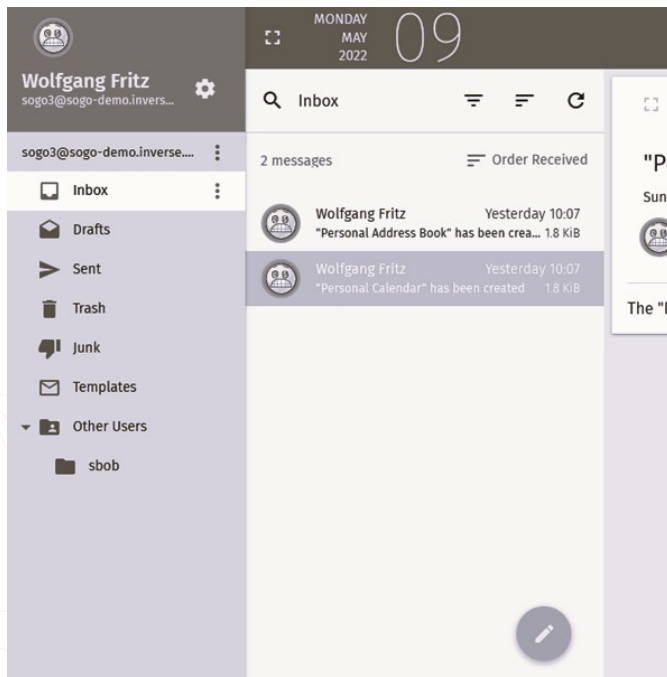

# Alinto and OpenSource solutions

## Webmail

Open-source webmail for free and collaborative use

Since 1. September 2022  
Official support

Universal, responsive and rich AJAX-based interface !

SOGO offers professional integration for businesses and communities.

With its rich AJAX-based web interface, it supports all clients using standard protocols such as CalDAV, CardDAV and GroupDAV, as well as Microsoft Outlook with efficient ActiveSync integration.

## Mailcleaner

Email security appliance that can be deployed at the heart of your network

June 2022, Alinto has completed Fastnet acquisition, becoming MailCleaner editor

MailCleaner Open-source Edition filtering technology is based on a group of sophisticated filtering technologies working together.

Users maintain total control over quarantine behavior

With a simple click, a user can delete or release any message retained by the filter.

The installation requires absolutely no modification of existing IT infrastructure.
